6617 1/2" (Ø20mm)

6618 3/4" (Ø25mm)

- Salmastralı sistem
- Kaba inşaat sırasında sıva altına montajı yapılmalıdır.
- PP - RC gövde yapısı sayesinde dış dış rakor kullanmaya ihtiyaç duyulmaz.
- Boy ayarı sayesinde duvar kalınlığına göre ayarlanabilir max. 85 mm, min. 30 mm
- Gizli taharet borulu asma klozetlerde ara musluk yerine kullanılabilir.
- Rozet fiyata dahildir.

6614 1/2" (Ø20mm)

6674 3/4" (Ø25mm)

- With seal
- Must be mounted in wall during rough construction.
- No need to use external thread fitting thanks to PP - RC body.
- Adjustable to wall thickness thanks to height adjustment max. 85 mm, min. 30 mm
- Able to be used instead of intermediate faucet in suspended toilet bowls.
- Rosette price included.

Montaj ve kullanım uyarıları

- Malın, taşıma ve nakliye sırasında kutu ve koliler ıslatılmamalı, ters çevrilmeden taşınmalı ve fırlatılmamalıdır. Çizilme, ezilme, kırılma vb. hasarlara yol açacak durumlara dikkat edilmelidir.
- Armatürleri mutlaka uzman bir tesisatçıya monte ettiriniz.
- Kartuşlu (seramik diskli) bataryaların montajı yapılırken bu ürünler için tasarlanmış filtreli ara musluklarını mutlaka kullanınız.
- Armatürü tesisata montaj yapmadan önce: tesisat içindeki paslı su ve inşaat atıklarını (taş, kum, vs.) temizleyiniz. Temizlenmeyen atıklar ve sudaki kireç zamanla süzgeçleri tıkamakta ve su akışını engellemektedir. Süzgeçleri dikkatlice söküp temizleyiniz. Armatürlerinizi temizlerken kesinlikle çamaşır suyu, kireç sökücü ve tuz ruhu vb. gibi temizlik malzemeleri kullanmayınız. Ürünlerin çizilmemesi için montaj anında ağızları plastik kaplı anahtarları kullanınız.
- Tesisatınızın içinde bulunan pisliklerin dışarı atılabilmesi için, bir miktar suyu mutlaka boşa akıtarak boruların içini temizleyiniz.
- Suyunuz temiz değilse, tesisatın ana girişine (sayaç yanına) ve armatürlerin soğuk su girişlerine mutlaka filtre takınız. Filtre belli zamanlarda temizlenmelidir.
- Banyo bataryasının eksantriğini tesisata bağlarken teflon bant kullanın. Bunun dışındaki ürünlerinizde, sadece kutu içinde verilen contalar ile montaj yapılabilir.
- Ankastre bataryalarda bağlantı hortumuna ilave yaptırmayınız, ara musluğunu yakınlaştırınız.
- Maksimum su sıcaklığı 70 C olmalıdır. Su basıncı 5 (bar)'dır. Bölgenizde su basıncı 10 (bar) atmosferden fazla ise; yüksek su basıncın da ana giriş ve daire girişine mutlaka basınç düşürücü takınız.
- Renkli krom ve kaplamalı mamülleri direkt güneş ışığına maruz bırakmayınız.
- Nakliye sırasında meydana gelen deformasyonlar, hatalı montajlar, tesisat atıkları ve kireçlenmelerden meydana gelen arızalar, yanlış ve sert kullanımlar, asit temizleme malzemeleri kullanılması durumunda oluşan arızalar garanti kapsamına girmez.
- Armatürlerimiz, insan ve çevre sağlığını tehdit edici herhangi bir madde içermemektedir. Armatürlerinizi güvenle kullanabilirsiniz.
- İnsan sağlığını ve ürün ömrünü korumak amacıyla su haricindeki sıvılarda kullanıma uygun değildir.

Installation and operating instructions

- Boxes and parcels should not be wetted during transportation, goods should be carried without reversing and not be thrown. Scratching, crushing, breaking etc. damage should be observed.
- Always have the fittings installed by a qualified plumber.
- When installing the faucets with cartridge (ceramic disc), use the filter angle valves designed for these products.
- Before installing; clean rusty water and construction waste (stone, sand, etc.) inside the plumbing. Uncleaned wastes and lime in the water clog the sieves over time and prevent water flow. Carefully remove and clean the strainers. When cleaning the fixtures, Do not use cleaning materials such as bleach, lime remover and muriatic acid.
- In order to dispose of the impurities in your installation, clean the inside of the pipes by draining some water.
- If your water is not clean, be sure to install a filter at the main inlet (near the meter) and the cold water inlets of the fittings. The filter should be cleaned periodically.
- Use teflon tape when connecting the eccentric of the bath mixer to the installation. Other products can only be assembled with the gaskets provided in the box.
- For concealed mixers, do not add to the connection hose, but keep the angle valve closer.
- The maximum water temperature should be 70 ° C. The water pressure is 5 (bar). If the water pressure in your area is more than 10 (bar) atmosphere; At high water pressure, always install a pressure reducer at the main inlet and the circle inlet.
- Do not expose colored chrome and plated products to direct sunlight.
- Deformations during transportation, faulty assemblies, faults caused by installation wastes and calcification, wrong and hard usage, faults in case of using acid cleaning materials are not covered by the warranty.
- Our fixtures do not contain any substances threatening human and environmental health. You can safely use them.
- Not suitable for use in liquids other than water to protect human health and product life.
